Location	Hayatabad, Industrial area, Peshawar.

DIRECTORY OF REHABILITATION SERVICES TO DISABLED AFGHANS IN PAKISTAN

UNOCA AND ACBAR TASK FORCE

PESHAWAR, JANUARY 1991

Introduction

A Task Force for Disabled Afghans has been in existence for some years in Peshawar. It was started by ACBAR and has been frequented by individuals and organizations involved in assistance to the disabled, from NGO of UN-agencies and ICRC. At the Task Force meetings a need for a directory of rehabilitation services for the disabled Afghans has repeatedly been expresse. During autumn 1990 UNOCA undertook to collect the information, compile it and edit a directory, which now exists in its first edition. The intention is to facilitate the work for organizations and individuals who work with disabled Afghans: where is the service available? What kind of service exists? and where can disabled Afghans get vocational training? The hope is that this directory will help in this form of work.

All organizations known to the Task Force have been approached for information. They are included in this directory if they had ongoing facilities including disabled Afghans and the of intention to continue this component. Not every organization wanted to be included in the directory. Therefore, it is not complete.

I. Medical and Educational Services
II. Vocational Rehabilitation Services

The medical and educational services encompass physiotherapy, production of orthopedic prostheses and other appliances, training of specialized staff, and special education. Health services in general have not been included. Vocational rehabilitation services reflect the ongoing activities, but they are often under utilized. Most organizations offering vocational rehabilitation have the potential to accept more disabled Afghans into their schemes. Also, other organizations that run vocational training may also consider including disabled Afghans.

In future editions we hope to include also the "public" assistance to the disabled, notably that of the political parties and the Afghanistan Interim Government. We also welcome comments to improve future editions, and if organizations exist that by our mistake have not been included we will soon be able to adjust it, if needed.

Peshawar January, 1991
